Slack incident cards: verdict, MITRE ATT&CK mapping, containment status (NACL rule #50). Attacker IPs and host redacted.

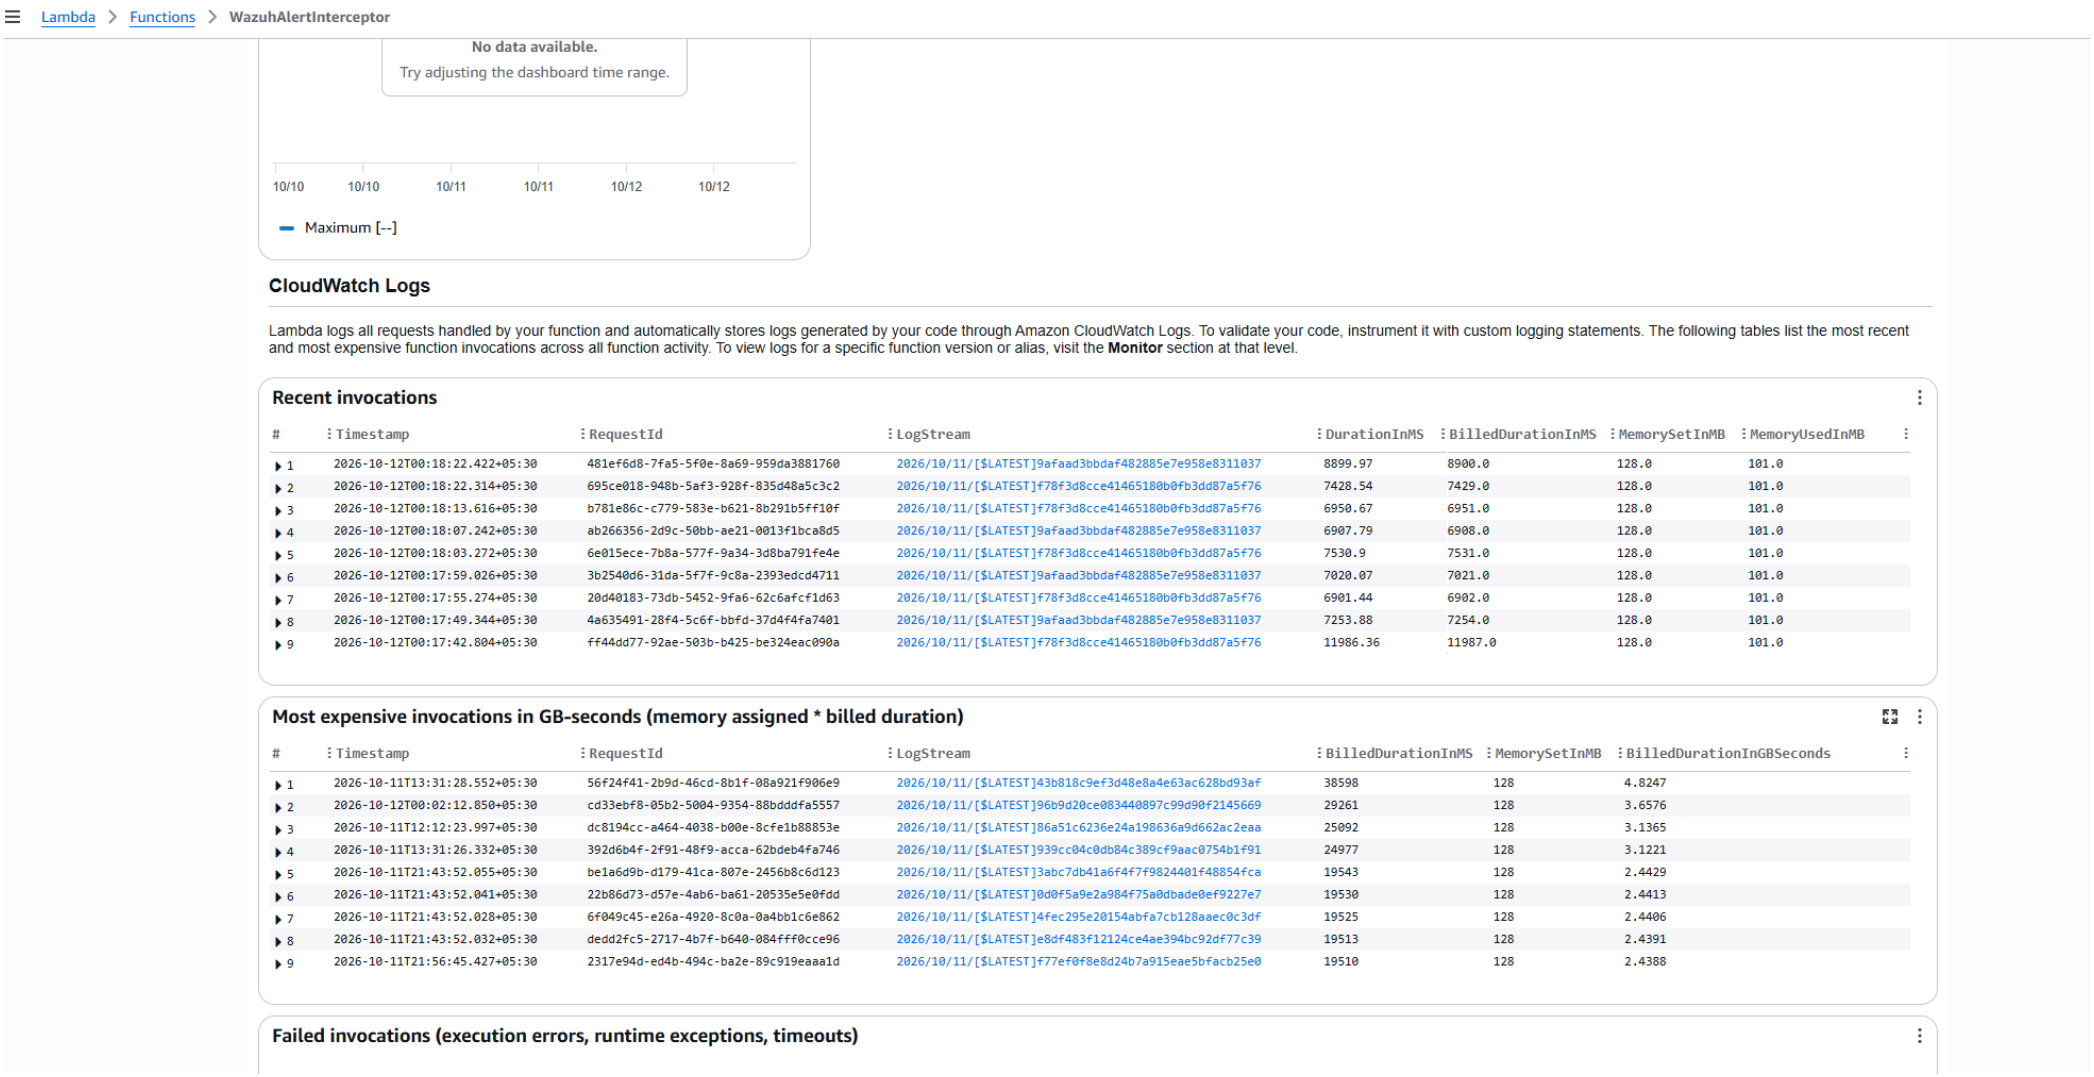

Repeat alerts for an IP that was already blocked (idempotency check). Attacker IPs and host redacted.

Lambda Monitor, 3-day window (10-12 Oct 2026): 260 invocations, 0 errors, 100% success rate.

Recent invocations: roughly 7-12 s each, 101 MB used of 128 MB.

CloudWatch Logs

Lambda logs all requests handled by your function and automatically stores logs generated by your code through Amazon CloudWatch Logs. To validate your code, instrument it with custom logging statements. The following tables list the most recent and most expensive function invocations across all function activity. To view logs for a specific function version or alias, visit the **Monitor** section at that level.

Recent invocations
